Art Unit: 3693

Claims 1-14 are rejected under 35 U.S.C. 102(b) as being anticipated by Flex Options – Chicago Board Options Exchange [hereinafter CBOE]. - a. receiving a request for proposal ("RFP") on a financial instrument from a requestor, the RFP including an RFP structure; providing an alert to each trader whose tradeable structures include the RFP structure (pages 3-4);
- b. during a first response period, receiving two or more responses to said RFP from two or more responders, each said responder providing at least one said response; transmitting said two or more responses to said requestor; allowing said requestor to trade on said two or more responses during a first exclusivity period, each said plurality of traders not being allowed to trade on said two or more responses during said first exclusivity period unless each said trader comprises said requestor, said first response period and said first exclusivity period being allowed to overlap (pages 6-7); and
- c. at the expiration of said first exclusivity period, allowing said two or more responders to trade on said responses during a second exclusivity period, said traders not being allowed to trade on said responses during said second exclusivity period unless each such trader comprises a requestor or said one or more responders (pages 6-7).

2. In reference to claim 2, CBOE teaches the electronic trading method and system further comprising matching orders at the expiration of said first period and before allowing said responders to trade on said responses (pages 6-7).

3. In reference to claim 3, CBOE discloses the electronic trading method and system wherein said orders are associated with a bid price or an offer price, said matching orders process further comprising matching crossed orders in which the highest bid prices is higher than the lowest offer price (pages 6-7).

4. In reference to claim 4, CBOE discloses the electronic trading method and system wherein any responses, which have not been traded on at the end of, said second period are migrated to a general market (pages 6-7).

5. In reference to claim 5, CBOE discloses the electronic trading method and system wherein traders are grouped into trading groups, said method further comprising transmitting said at least one response to said requestor's trading group and said at least one responder's trading group, each said plurality of traders not receiving said responses unless said trader comprises a trader in said requestor's trading group or said at least one responder's trading group (pages 6-7).

6. In reference to claims 6-7, 9 and 11, CBOE discloses the electronic trading system, method and apparatus, including:

- a. allowing trader's in said requestor's trading group to trade on said responses during said first period, each said plurality of traders not being allowed to trade on said response during said first period unless said trader comprises a trader in said requestor's trading group;
 - b. allowing traders in said responder's trading group to trade on said responses during said second period;
 - c. wherein said tradable structures for each said trader are a function of potential traders to a trade;
 - d. migrating said responses to a general market at the expiration of said third exclusive period (pages 6-7).
7. In reference to claim 10, CBOE discloses the electronic trading method and system wherein said first period and said second period are co- terminus (pages 6-7).
